What did you learn from this course that will be most useful?

*I have a better understanding of color theory.
 Excellent exercises (coloring + scavenger hunt!)
 It was relaxing compared to our 541 class but still too fast for me.*

Did you have any questions that weren't answered? If yes, what were they?

I still can get the drawing tools to work. There is alot I don't get for how to make the tools work.

What would you change about this course to make it more useful to future participants?

Pause ~~all~~ for questions throughout. more instruction in using tools.

Great job overall!

What did you learn from this course that will be most useful?

@ the end, I got my question answered (about imparting an image from the web & not being able to edit it) and that was great.

Did you have any questions that weren't answered? If yes, what were they?

I will need to understand ^{saving} filing images in photoshop - e.g. why PS creates two types of image when I save one image - etc.

What would you change about this course to make it more useful to future participants?

The filing / layering / sequencing - is not always easy to follow - the instructors were willing to repeat, when they saw some people struggling & they were sensitive to audience needs. I would just applaud that & encourage it.

I thought this class was incredibly useful - it was fun and interesting -

I want more advanced work on layers -

I still feel like certain

Did you have any questions that weren't answered? If yes, what were they?

Basic functions are lost on me - like

deselecting and control over what is going on -

Overall tho it was very excellent and

What would you change about this course to make it more useful to future participants?

Photoshop is a complex program -

What did you learn from this course that will be most useful?

general knowledge about images was really good + helpful.
 also. what different image types do + how to save images as what was also good

Did you have any questions that weren't answered? If yes, what were they? **NO**

FOR FUTURE TOPICS

- filters
- creating icons, graphics design elements

What would you change about this course to make it more useful to future participants?

future courses to address "cool stuff" to do or different features should have really exhaustive example sets. e.g. images the whole class would work on ~~and~~ do different things to
